

## SQL Import Data Commands

*To import the data the SQLite is first changed to csv mode to ignore the headers in the csv file as the data is imported into the tables with the --csv flag.*

```
C:\Users\mrakh\Desktop\CSE 3330\Project 1 DataSet\sqlite3.exe
SQLite version 3.39.4 2022-09-29 15:55:41
Enter ".help" for usage hints.
Connected to a transient in-memory database.
Use ".open FILENAME" to reopen on a persistent database.
sqlite> .open ticketing.db
sqlite> .mode csv
sqlite> .import ./BookTicket.csv BOOKTICKET --csv
sqlite> .import ./Cinema.csv CINEMA --csv
sqlite> .import ./City.csv CITY --csv
sqlite> .import ./Movies.csv MOVIES --csv
sqlite>
sqlite> .import ./Screening.csv SCREENING --csv
sqlite> .mode table
sqlite>
```
